

The first multinational wireless controlled door lock.

The Poly-Lock has been made to fit almost any door in the world.

The lock is easily mounted on the existing door lock without having to change the lock case.

The lock is mounted in 5 minutes, you only change the cylinder.

The Poly-Lock can fit both external and internal doors.

The Poly-Lock is operated with wireless Z-wave. You can use the lock in any Z-Wave network.

Locking and unlocking is done from any Z-wave remote control or the Poly-Pad.

When connected to a gateway you can monitor and control your Poly-Lock from anywhere in the world.

You can use the applications for Android and Iphone or the web interface to control the Poly-Lock.

The Poly-Lock is battery operated, and has been tested to work for 3 years, without changing the battery.

The Poly-Lock is mounted on the inside of the door, and works just like a normal thumbturn on the inside.

Outside there are no visible signs of the access control.

Z-wave is the wireless protocol used for the Poly-Lock, all data sent to the lock is of course encrypted.

Demo videos are found on our homepage. Prices for wholesales and distribution are send upon request.

The Poly-Lock is available in several different finishes depending on orders.
